Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 31-40 are rejected under 35 U.S.C. 102 (e) as being anticipated by
Funayama (US 6389155 B2).

Regarding claim 31, 35, and 39, Funayama discloses an image processing method by which a cutout area having a face area is cut out from an original image including a human face, comprising:

Funayama discloses a calculation step of, in a case where it is discriminated that the cut-out area is smaller than the face area (Funayama, Fig. 16), calculating a reduction ratio so that the face area is included in the cut-out area (Funayama, column 13, line 30-38) and a correction step of executing enlargement correction to the cut-out area based on the reduction ratio (Funayama, column 4, line 33-34), as well as maintaining an aspect ratio of the cut-out area (Funayama, column 9, line 3-7).

Regarding claim 32 and 36, Funayama discloses an image processing method according to Claim 31, wherein the reduction ratio is calculated so that the horizontal width of the cut-out area becomes equal to the horizontal width of a noticeable area of output image data (Funayama, column 9, line 11-15).

Regarding claim 33, 37, and 40, Funayama disclose an image processing method by which a cut-out area having a face area is cut out from an original image including a human face, comprising: a calculation step of, in a case where it is discriminated that the cut-out area is larger than the face area, calculating a reduction ratio so that the cutout area is included in the original image; and a correction step of executing reduction correction to the cut-out area based on the reduction ratio, as maintaining an aspect ratio of the cut-out area (Funayama, column 13, line 22-30).

Regarding claim 34 and 38, Funayama discloses an image processing method according to Claim 33, wherein the reduction ratio is calculated so that the horizontal width of the cut-out area becomes equal to the horizontal width of output image data (Funayama, column 9, line 11-15).
